**THE WORLD'S MOST INTELLIGENT VIDEO SURVEILLANCE INCREASES ITS IQ
iOmniScient Announces the Launch of IQ-Infinity**

iOmniScient, providers of the World's most Intelligent Video Surveillance products have incorporated both their Internationally Patented Non-Motion Detection (NMD) with their highly advanced Video Motion Detection (VMD). The outcome is IQ-Infinity; the most comprehensive Intelligent Video Surveillance application in the World.

The launch of IQ-Infinity will officially take place at ISC West in Las Vegas in early April. The convergence of NMD with VMD gives IQ-Infinity the full range of iOmniScient's detection capabilities, of which many are only available from iOmniScient. Some of these capabilities include Abandoned Object Detection in a Crowd, Theft Detection in a Crowd, Graffiti and Vandalism Detection in a Crowd, Crowd and Traffic Management, Perimeter Protection and Intruder Detection and Counting, as well as complex Behavior Analysis and Tracking.

Dr. Rustom Kanga, CEO of iOmniScient had this to say about the current position of iOmniScient:

"These are very exciting times for iOmniScient. ISC West will see the launch of a lot of time effort in IQ-Infinity, as well as the launch of yet another World First, IQ-Hawk. We will also be announcing the release of IQ-Implant, an embedded version of our unique software. Our highly committed Development Team has been working very hard over the last few months which is why we can and will continue to provide revolutionary World First solutions, much more advanced than anything else available in the industry."

iOmniScient has been recognized as the leader in Intelligent Video Surveillance having won major Security Industry Awards in the UK, Europe, USA, Asia and Australia. iOmniScient's Non Motion Detection (NMD) products are the only products on Earth that can accurately operate in crowded scenes despite heavy motion and obscuration and is revolutionizing the way in which surveillance is being performed globally. Based on Artificial Intelligence, iOmniScient's range of intelligent video analysis software has been implemented at many sites around the world.
