iOmniScient's Makes Major Breakthrough in Korean Market

iOmniScient, developer of IQ-Infinity, the World's most comprehensive Intelligent Video Surveillance product continue to build on their fast growing list of international customers, acquiring yet another installation.

The Pohang and Ulsan Customs Agency in Korea have recently decided to join the large list of customers who have selected an iOmniScient IQ Series solution. The system will be used to monitor both the harbor and surrounding critical infrastructure.

The installation was made possible by Crifas, a Korean partner committed to offering IQ Series sales and technical support throughout South Korea.

Crifas was established to provide specialized service for critical facilities such as data centers, hospitals, bio-laboratory and factory, telecommunication centers and call centers.

To keep constant reliability, Crifas can provide right electric power quality test and monitoring activities, raised floor air flow simulation before/after server/perforated tile location.

Crifas can protect investment in mechanical systems and equipment while minimizing overall cost of ownership. Crifas can provide proven preventive maintenance and predictive maintenance to ensure optimal system performance and reduce operational costs.

iOmniScient has been recognized as the leader in Intelligent Video Surveillance having won major Security Industry Awards in the UK, Europe, USA, Asia and Australia. Using internationally patented Non Motion Detection (NMD), the IQ Series is the World's only Intelligent Video Surveillance product to accurately operate in crowded scenes, regardless of constant movement in the camera's field of vision. Armed with an unrivaled Nuisance Alarm Minimization System (NAMS), the IQ Series easily copes with complex scene changes caused by lighting, shadows, wind and other environmental factors. Highly flexible architecture and the ability to run on an infinite number of analog or IP cameras makes the IQ Series the most cost effective solution whether installing at a new site or interfacing with an existing system.

###
